

Kishore P

Java Full-Stack Developer

+91-9344327434 | kishore062922@gmail.com | LinkedIn | GitHub | Portfolio

SUMMARY

Java Full-Stack Developer specializing in Spring Boot and React.js with hands-on experience building JWT-secured web applications, REST APIs, and responsive dashboards. Strong understanding of backend architecture, database design, and frontend integration through real-world projects and internship experience.

SKILLS

Core Languages: Java, JavaScript (ES6+)

Frontend: React.js, HTML5, CSS3, Tailwind CSS, Responsive Web Design

Backend: Spring Boot, Spring MVC, Spring Security, RESTful APIs, JWT Authentication, Microservices

Database: MySQL, Database Schema Design, Query Optimization

DevOps & Tools: Docker, CI/CD (GitHub Actions), Git, GitHub, Postman, IntelliJ IDEA, VS Code

Testing: JUnit, Postman (API Testing)

Cloud: AWS (EC2, S3 — fundamentals)

Concepts: OOP, MVC Architecture, CRUD Operations, RBAC, Agile Development

EXPERIENCE

Web Developer Intern

Feb 2026 – Mar 2026

Black Coffee Brands

Chennai, Tamil Nadu, India

- Engineered responsive React.js components using Tailwind CSS, achieving consistent UI across more than five device breakpoints.
- Partnered with the development team to resolve bugs, deliver feature upgrades, and improve overall application reliability.
- Directed Git/GitHub workflows, delivering 20+ commits that streamlined collaborative development practices.
- Secured seamless data exchange between React.js frontend components and Spring Boot backend services through API integration and feature testing.

PROJECTS

Franchise Management SaaS Platform | *Java, Spring Boot, React.js, MySQL, JWT, Docker* Jan 2026 – Apr 2026

- Built a centralized franchise monitoring platform covering multiple branch locations with real-time sales tracking and inventory management.
- Designed RESTful APIs using Spring Boot following a layered Controller-Service-Repository architecture to handle CRUD operations and business logic processing.
- Developed a responsive React.js admin dashboard with role-based access control (RBAC) for managing outlets, employees, and product catalogues through a centralized interface.
- Implemented JWT-based authentication with Spring Security and designed a normalized MySQL schema for secure and scalable data management.
- Added dynamic search, advanced query filters, and server-side pagination to optimize query performance across large franchise datasets.
- Containerised the application with Docker and configured a CI/CD pipeline via GitHub Actions for automated build and deployment.

Full-Stack Real Estate Marketplace | *Java, Spring Boot, React.js, MySQL, JWT*

Jun 2025 – Nov 2025

- Developed a property listing marketplace with an authenticated admin panel, enabling agents to create, update, and manage 200+ listings through a clean dashboard interface.
- Connected Spring Boot RESTful APIs to a React.js frontend, enabling dynamic real-time property CRUD operations and seamless frontend-backend integration.
- Built keyword-based property search and multi-criteria filtering with paginated results to improve property browsing and data retrieval efficiency.
- Secured the admin panel with JWT token authentication and structured the MySQL schema for scalable data growth without performance degradation.

CERTIFICATIONS

- **Advanced Java Certification** | 2024 — Completed advanced modules covering OOP, exception handling, collections framework, and backend development concepts.
- **Java Programming** | NPTEL (SWAYAM) | 2024 — Completed structured coursework covering Java fundamentals, data structures, and application development.

EDUCATION

B.E. Computer Science and Engineering <i>Latha Mathavan Engineering College, Madurai</i>	Expected: Jun 2026 <i>CGPA: 7.2 / 10</i>
